CRASH TEST JANUARY 2013

All Ford Fiesta for ASEAN market is produced in Thailand. Except for Malaysia with double airbags, Ford offers single airbag variant for the rest of ASEAN market. This model is not available in Singapore and Myanmar.

Regarding P3 dummy (Child Occupant Protection), the test was conducted using seat belt and ISOFIX attachment due to the unavailability of top tether anchorage point. Ford will introduce top tether to all ISOFIX applications in ASEAN Fiesta no later than 20th May 2013. Predicted calculation of CRS assessment is a minimum increment of 10% from current scoring with the availability of top tether.
